

GEORG-AUGUST-UNIVERSITÄT
GÖTTINGEN

Invitation

Presentation and Discussion

“Future scenarios for national and international agricultural research”

PROF. DR. FRANK EWERT
ZALF Müncheberg

11th December 2019

16:15 – 17:45

Von-Siebold-Str. 8, Göttingen, Room L 01

Introduction and Moderation: Prof. Dr. Reimund Rötter

TROPAGS, Georg-August-Universität Göttingen

Part of the lecture series „Studienrichtungskolloquium“ of the Department of Crop Sciences

Prof. Dr. Frank A. Ewert has been scientific director of the ZALF since March 1, 2016. His work focuses on the areas of crop science and mathematical modeling in relation to agricultural system research. For Ewert, interdisciplinary cooperation is extremely important to answer questions of our time. What influences do agricultural systems have on climate change? How do we feed a growing world population while using natural resources sustainably? What possibilities do technological developments offer for the design of agricultural landscapes? Ewert regards modeling as a way to reduce complex relationships to the essential.
