# Übersicht nach Modulgruppen

## I. Master-Studiengang "Modern Indian Studies"

Es müssen wenigstens 120 C erworben werden. Im Rahmen des Studiums sind Module im Umfang von insgesamt wenigstens 12 C zu absolvieren, die den Erwerb von Kenntnissen einer modernen indischen Sprache zum Gegenstand haben; diese können nach Maßgabe der nachfolgenden Bestimmungen sowohl im Fachstudium als auch im Professionalisierungsbereich absolviert werden, außerhalb des Professionalisierungsbereichs werden sie nur bis maximal 12 C im Gesamtergebnis der Masterprüfung berücksichtigt. Soweit ein Modul in mehreren Wahlpflicht- oder Wahlbereichen wählbar ist, kann es nach erfolgreicher Absolvierung nur in einem dieser Bereiche berücksichtigt werden.

Die Prüfungskommission kann Ausnahmen von dieser Regelung zulassen, insbesondere, wenn Studierende bereits über Kenntnisse einer modernen indischen Sprache verfügen oder sie in einem anderen Studienfach erwerben.

### 1. Fachstudium Modern Indian Studies im Umfang von 78 C

Es müssen Module im Umfang von 78 C nach Maßgabe der nachfolgenden Bestimmungen erfolgreich absolviert werden. <b>Georg-August-Universität Göttingen</b>	<b>Module M.MIS.007: Topics in Modern Indian Studies III: Ideologies, Worldviews and Religions</b>	9 C 4 WLH
<b>Learning outcome, core skills:</b>  Students gain in-depth knowledge of specific aspects and questions of modern Indian studies related to ideologies, worldviews and religions from an interdisciplinary perspective. They are able to apply these critically to the academic literature as well as examine them on the basis of primary sources in the methodological framework of different disciplines. They are able to discuss subject-specific topics and can defend their arguments independently.	<b>Workload:</b>  Attendance time: 56 h Self-study time: 214 h	
<b>Course: Seminar</b>	2 WLH	
<b>Course: Übung</b>	2 WLH	
<b>Examination: Referat (ca. 15 Minuten) mit schriftlicher Ausarbeitung (max. 15 Seiten)</b>	9 C	
<b>Examination requirements:</b>  The students are familiar with relevant academic literature of select topics of Modern Indian Studies related to ideologies, worldviews and religions, and are able to apply these to different issues across disciplines. They are able to develop their own theses and can present and defend them. They have in-depth knowledge of methods of modern Indian Studies.

<b>Georg-August-Universität Göttingen</b>	<b>Module M.MIS.032: Studies in the Anthropology of Power I: Group-wise Hierarchies</b>	6 C 4 WLH
<b>Learning outcome, core skills:</b>  Students acquire a systematic overview of the institutional bases and typical cultural features of inherited group-wise hierarchies. We focus in particular on caste in the Indian context, but comparative examples consider ethno-racial status hierarchies elsewhere in the world. We consider the role of these hierarchies in organizing and stabilizing exploitative economic arrangements. Special attention is devoted to endogamous kinship systems, understood as social structures based ultimately on group-wise hoarding of wealth and social prerogatives, and requiring high degrees of intergenerational sexual control.	<b>Workload:</b>  Attendance time: 56 h Self-study time: 124 h

<b>Georg-August-Universität Göttingen</b>	<b>Module M.MIS.033: Studies in the Anthropology of Power II: the Social Organisation of Production and Reproduction</b>	6 C 4 WLH
<b>Learning outcome, core skills:</b>  This module familiarizes students with the social organization of production, reproduction, and exchange. It draws on studies in the anthropology of inequality and economic anthropology, and uses examples from India and a broad range of social formations, from hunter-gatherer to modern market economies. We cover gendered divisions of labor and the distinctions among wage labor, feudal service, debt bondage, slavery, and domestic production. We also consider different models of exchange, such as generalized reciprocity, redistribution, and negative reciprocity.	<b>Workload:</b>  Attendance time: 56 h Self-study time: 124 h

<b>Georg-August-Universität Göttingen</b>	<b>Module M.MIS.034: Theories and Methods in Social-Cultural Anthropology I: Ethnography</b>	6 C 4 WLH
<b>Learning outcome, core skills:</b>  This module introduces students to the empirical backbone of social and cultural anthropology: the practice of ethnographic fieldwork. What unique reality does fieldwork claim to discover, and on the basis of what evidence? How does ethnographic fieldwork differ from mere "qualitative research"? What are the ethical obligations of the researcher to his or her subjects? And, most importantly, how does one prepare for ethnographic research and what methods does one use? Students who successfully complete this module will receive the basic training needed to begin ethnographic research. They will also acquire some of the tools needed to critically evaluate the use of ethnographic evidence in published research.	<b>Workload:</b>  Attendance time: 56 h Self-study time: 124 h

<b>Module M.MIS.035: Theories and Methods in Social-Cultural Anthropology II: Anthropology as Social Science</b>	<b>4 WLH</b>

<b>Learning outcome, core skills:</b> This module introduces students to the major theoretical frameworks of social science, with special reference to social and cultural anthropology. What does it mean to scientifically study society? How does social science differ from natural science? What unique reality does social science claim to discover, and on the basis of what evidence? Major themes include the distinction between methodological individualism and holism, the structure–agency problem, functionalism, explanation versus interpretation, and theories of causation.	<b>Workload:</b> Attendance time: 56 h Self-study time: 124 h

<b>Learning outcome, core skills:</b>  After successful completion, students will be able to understand why countries in the world are at different stages of economic development and how such development can be measured using different metrics. They can explain how historical income differences between countries developed, they can use theories of growth and trade to evaluate the constraints faced by developing countries. They can critically evaluate the role of population growth as well as aid and debt in affecting development, and they will be able to analyze regressions to evaluate determinants of economic development.	<b>Workload:</b>  Attendance time: 56 h Self-study time: 124 h	
<b>Course: Development Economics I (Lecture)</b>  <i>Contents:</i> Overview of macroeconomic issues and approaches to analyzing problems of developing countries. Topics include measurement of development, historical evolution of income differences, growth theory, and linkages between globalization, aid, debt, population, the environment, and inequality and economic development.	2 WLH	
<b>Course: Development Economics I (Exercise)</b>  <i>Contents:</i> The exercise session is used to deepen understanding of concepts used in the lecture, discuss relevant literature, and apply concepts and methods developed in the lecture.	2 WLH	
<b>Examination: Written examination (90 minutes)</b>  <b>Examination prerequisites:</b> Submission of 6 exercise sheets (of sufficient quality). The exercises deepen the understanding of concepts and empirical methods taught in the lecture and apply it to specific cases.	6 C	
<b>Examination requirements:</b>  The students are able to explain concepts of economic development, their measurement, and the historical evolution of the development of countries. They demonstrate a good understanding of key theories and models of economic development, including growth and trade models. They are able to critically present these theories and models, are able to interpret empirical results from regression analyses that relate to these models, and are able to draw relevant policy conclusions coming out of these models and empirical assessments.

<b>Course: Quasi-Experiments in Development Economics (Lecture)</b> <i>Contents:</i> The course deals with common quasi-experimental approaches for measuring causal effects in development economics. The content focuses on the distinction between correlation and causality and provides students with a statistical toolkit which will allow them to plan and conduct their own independent research. The lecture starts off with a theoretical foundation of the counterfactual problem and how randomized controlled trials (RCTs), considered the gold standard, solve the counterfactual problem. Special attention is paid to endogeneity caused by omitted variables, reverse causality and measurement error. The main part of the course deals with common quasi-experimental approaches to causal effect identification, including difference-in-differences and fixed effects estimation, instrumental variables estimation, regression discontinuity design and matching design. The course further deals with standard error issues inherent to specific methods and their solutions as well as issues with multiple hypotheses testing. In the lecture, special attention is paid to the specific assumptions necessary for each quasi-experimental technique to measure causal effect and common threats to identification (such as selection bias). This is discussed based on a theoretical framework as well as at examples from the literature. <i>Course frequency:</i> each winter semester	2 WLH
